Stop Waste

Fresh Food Date-Check Management Solution

Innovative, Flexible, Solution Driven

EM Cloud™

GaP SOLUTIONS

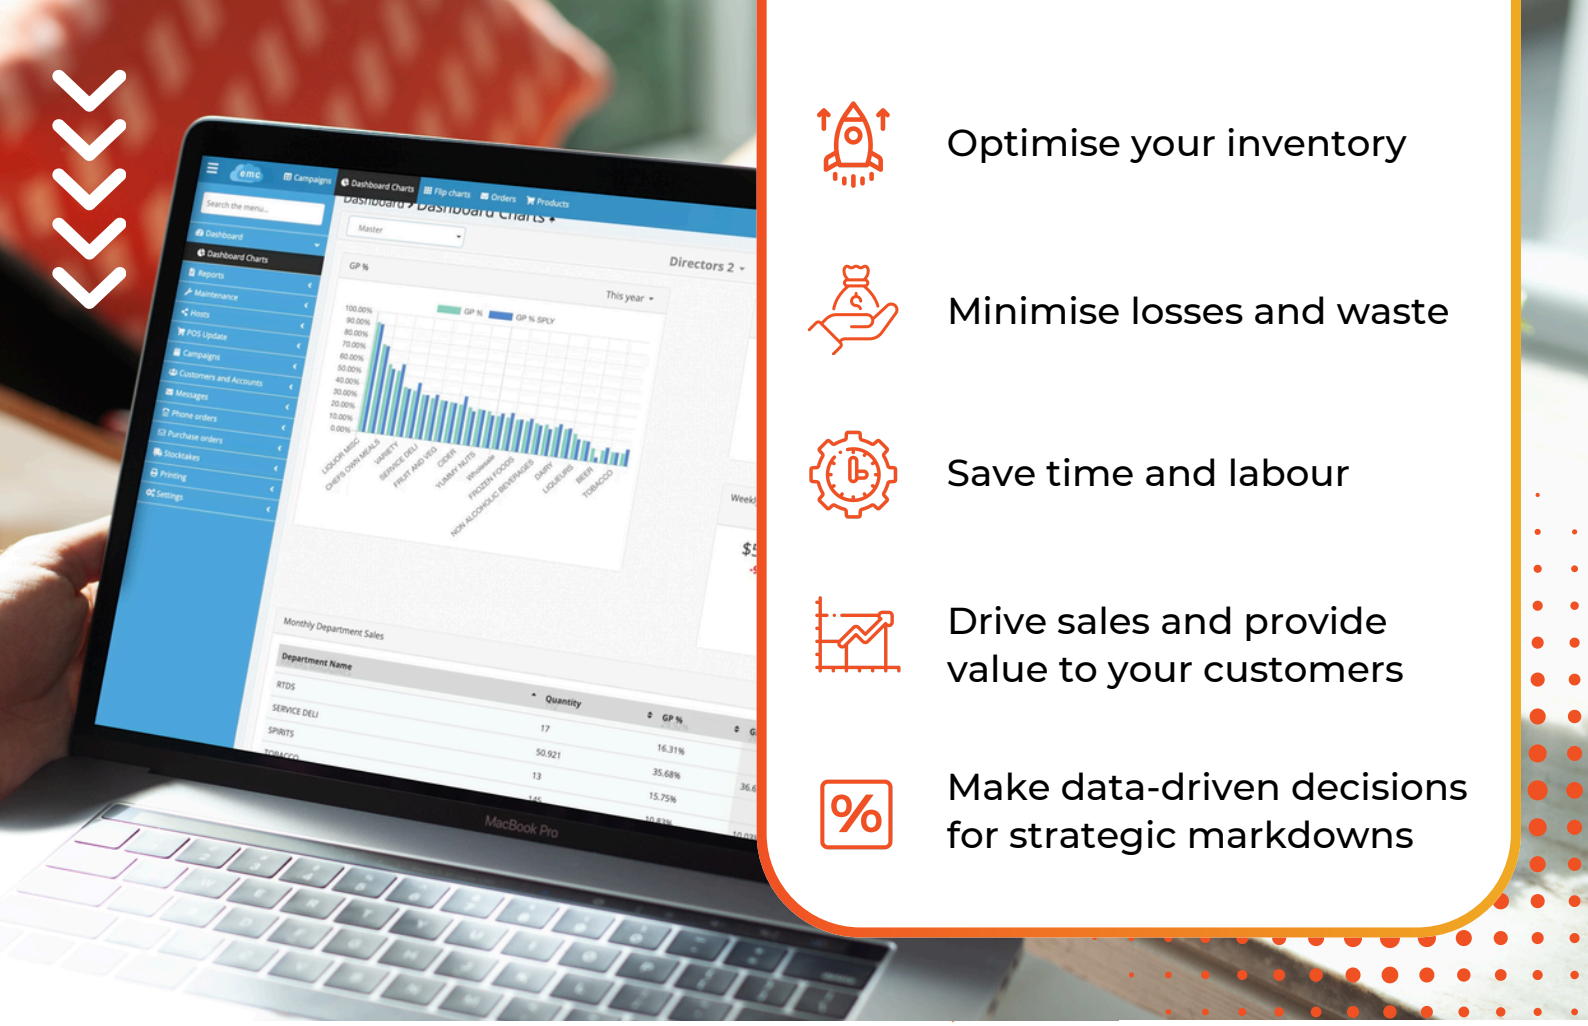
Simplified, Automated, Innovative with EM Cloud™

Introducing fresh food date check management solutions from GaP Solutions, designed to streamline fresh food management and reduce waste in grocery retail stores.

Our cloud-based, machine-learning-enriched solutions are redefining how you will manage your store's inventory and waste.

Experience seamless optimisation of merchandising and replenishment while strengthening compliance and sustainability.

Embrace the future of fresh food date-check management with us.



- Optimise your inventory
- Minimise losses and waste
- Save time and labour
- Drive sales and provide value to your customers
- Make data-driven decisions for strategic markdowns

Time-Saving

Say goodbye to the tedious task of manually checking dates on fresh produce. Our automated system works for you, significantly reducing your staff's time on date checks.

Food Waste Reduction

With our advanced rule based formulations and reporting system, you can effectively manage your fresh food inventory, minimising the risk of spoilage and reducing food waste. This benefits your bottom line and contributes to a more sustainable retail environment.

Daily Reports and Notifications

Stay informed and in control with our comprehensive daily reports and notifications. Receive up-to-date information on approaching use-by dates, enabling you to make timely markdown decisions and optimise inventory management.

Our Date Check Features

Close to Date Reporting

Easily find products nearing their expiration dates. Our system identifies items approaching their use-by dates, giving you ample time to implement strategic markdowns or discount promotions.

Early Expiration Notifications

Stay ahead of the game with our early notification system. Receive alerts via reports or directly through EM Omnia PDE for products nearing their use-by dates, allowing you to take proactive measures.

Integrated Electronic Shelf Labels (EM ESL)

Streamline your inventory management with our integrated EM ESL system. Benefit from flashing visual cues for easy picking and expiry date tracking. Effortlessly make price changes and markdowns, saving time and labour.

The transition to digital shelf labels is a game-changer for our clients. It is not only about improving efficiency and customer satisfaction, but also about integrating sustainability into our work, in this case, to help reduce operational waste.

2D Barcode & GS1 Datamatrix Markdown Functionality

Our advanced 2D barcode and GS1 Datamatrix functionality simplifies your markdown process. Quickly and accurately change prices, print labels, apply them to the products via EM Omnia PDE, and mark down printer.

Comprehensive Reporting

Access detailed reports that show expiration dates in advance. Gain valuable insights into your inventory and make informed decisions to stop waste and drive sales.

Point of Sale Security

Our advanced point-of-sale software ensures food safety by automatically preventing transactions for products that have reached their use-by-date. This guarantees the highest food safety standards both in-store and for your customers.

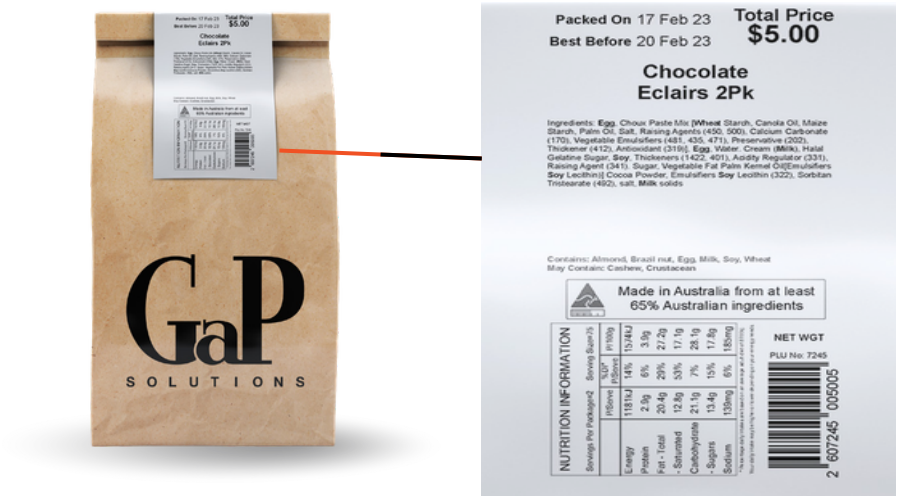
Our Labeling and Scale Features

Ezi Scale Operations Optimisation

Using GaP Solutions Ezi Scales brings a host of benefits to streamline your operations, from markdowns, stock takes, dump stock management and automatic use-by-date integration.

Up-to-Date Nutritional Label Printing

Stay compliant with all regulatory requirements for nutritional labelling. Our advanced nutritional label printing solution is based on an extensive food and ingredient database, ensuring that your labels include all necessary nutritional fact panels, ingredients, allergen statements, and country of origin information.



Guaranteed Price and Data Accuracy

Our solution guarantees complete price and data accuracy across all weighing and labelling devices. This reduces potential revenue loss due to pricing errors and enhances your store's reputation for reliability and accuracy.

AI Product Recognition at Point of Sale Scales

Leverage the power of Artificial Intelligence to enhance security, prevent loss, and manage inventory more effectively. Our AI fresh produce product recognition solution accurately identifies fresh produce at the point of sale, streamlining the checkout process and improving the overall shopping experience for your customers.

Maintain Price Integrity with Automated Scale Updates

Our system ensures that all your weighing and labelling printing devices are updated in real time, maintaining price integrity across the board. This automation saves time and reduces the risk of human error.

Linerless Label Printing for Versatility

Our scales are equipped to print on linerless labels, offering flexibility in label size and design. This enables your store to provide detailed ingredient labels, no matter the packaging size, ensuring that your customers have all the information they need at their fingertips.

Our Automated Ordering and Inventory Management Features

Streamline operations, stop waste, and enhance efficiency with automated ordering and inventory management.

Seamless Supplier Integration

Our software efficiently connects you with your hosts and suppliers, simplifying the ordering process and ensuring timely deliveries.

Efficient & Profitable Automatic Reordering

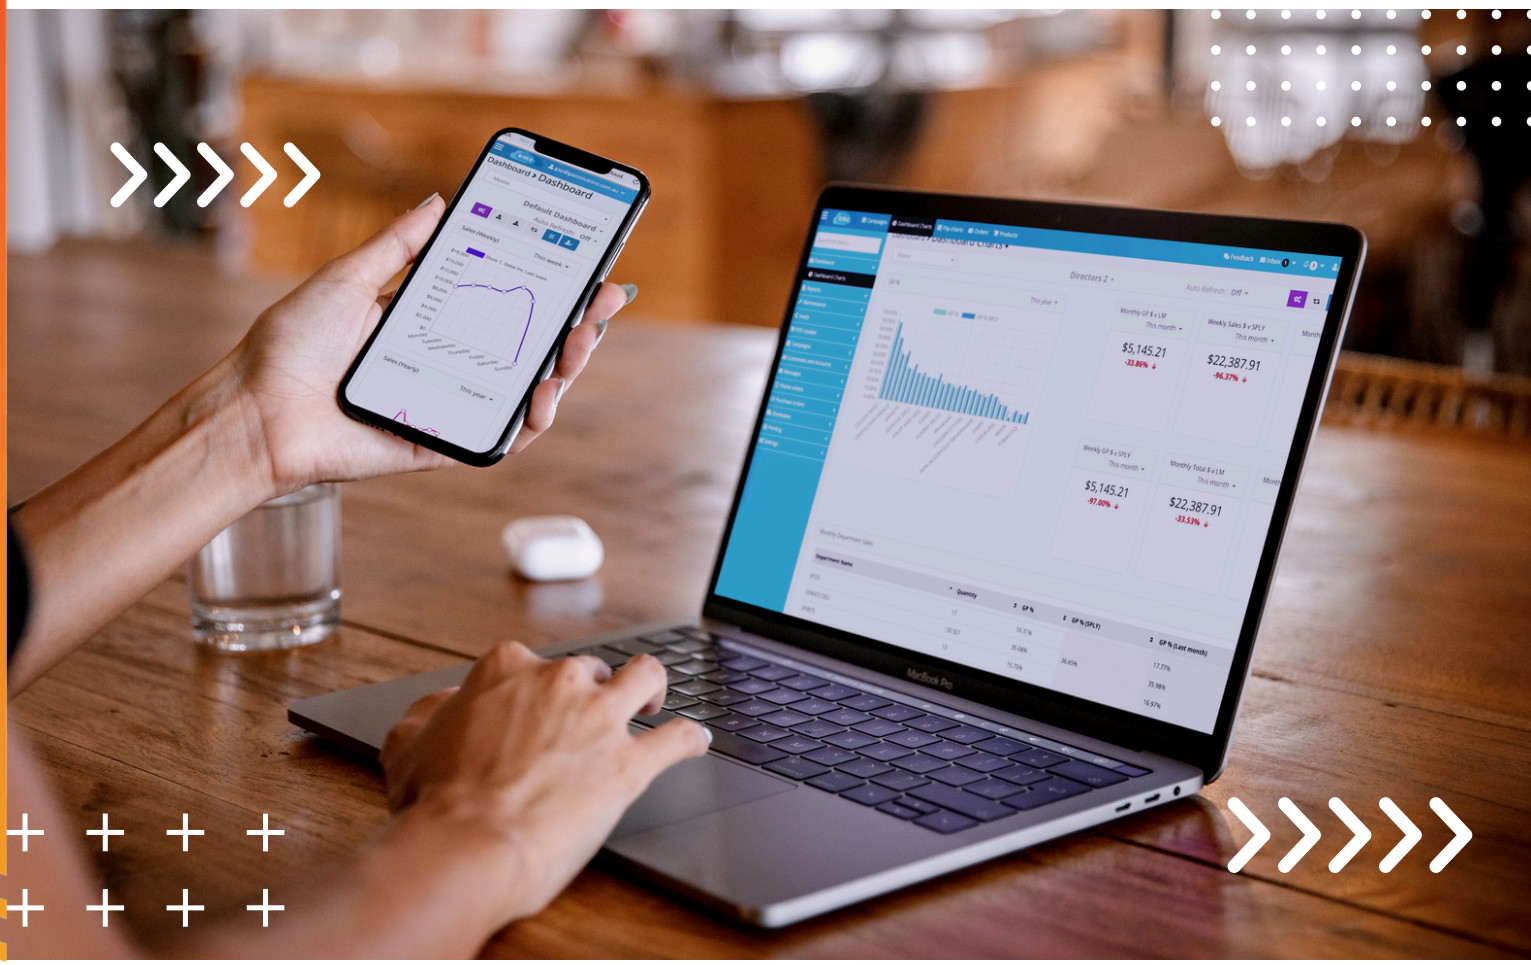
Our advanced software analyses sales trends, marketing campaigns, future pricing alongside current inventory levels to automatically generate precise purchase orders. This ensures your shelves are always stocked with the right products at the right time.

Real-Time Insights

We make decision-making with immediate access to critical data. Our software offers real-time insights into sales performance, stock, and other key metrics, enabling you to make strategic decisions that boost profitability and streamline operations.

Smart Inventory Management

Our software optimises stock levels based on detailed demand patterns. It significantly reduces excess stock and helps stop waste, leading to a more sustainable and profitable operation.



Customisable Settings

Every store is unique, and our software recognises this. Customise reorder points, adjust inventory levels, and tailor reports to meet your business's specific needs, ensuring our solution works for you.

User-Friendly Interface

Designed with simplicity in mind, our software boasts a user-friendly interface that makes managing your inventory and placing orders effortless. Even with minimal training, your team can efficiently handle operations, allowing you to focus on growing your business.

Moving to EM Cloud™ was one of the biggest decisions we've ever made in our business, and we haven't looked back. The GaP Solutions team provides unparalleled service and support, allowing us to focus on running our store. The ordering and inventory modules, along with master-level data, have significantly increased our business efficiency.

— Ghaz Ahmedi, Owner, Ahmedi Group

★★★★★

GaP Solutions' EM Cloud™ allows us complete visibility and control over every aspect of our supermarket. We can make informed, real-time decisions and leverage all commercial opportunities as we see fit.

— SUPAEXPRESS Chapman, Owner

★★★★★

The EM Cloud™ system from GaP Solutions is perfect for us because it provides easy accessibility anywhere in the country on any type of device.

As a multi-store owner, I love being able to see all our store information with just one login. The platform is user-friendly and makes it easy to navigate and resolve any store issues quickly.

— Ash Thompson, Operations Manager Kaur Group
