Your **All-In-One** Retail Solutions Partner

GaP Solutions offers a comprehensive range of retail products and services as part of our focused business strategy for the Australian and international retail markets. Our expertise and products have cultivated long-standing partnerships with our clients.

Our Vision

We have developed into a leader in the retail software and equipment industry over three decades by investing in skills, technical superiority, and the progressive application of our technology.

Our Mission

We pride ourselves on service accuracy through strong and diverse infrastructures along with shared industry intellect. Expert advice, dedication, flexibility, and outstanding service are what we're all about.

Innovative

We have the ability to create and implement innovative solutions.

Flexible

What makes us unique and allows us flexibility is that we don't outsource the important elements of our business.

Solution Driven

Being relevant through innovation is keeping us ahead of the pack.

Stop Waste: Product Expiration Management Solution

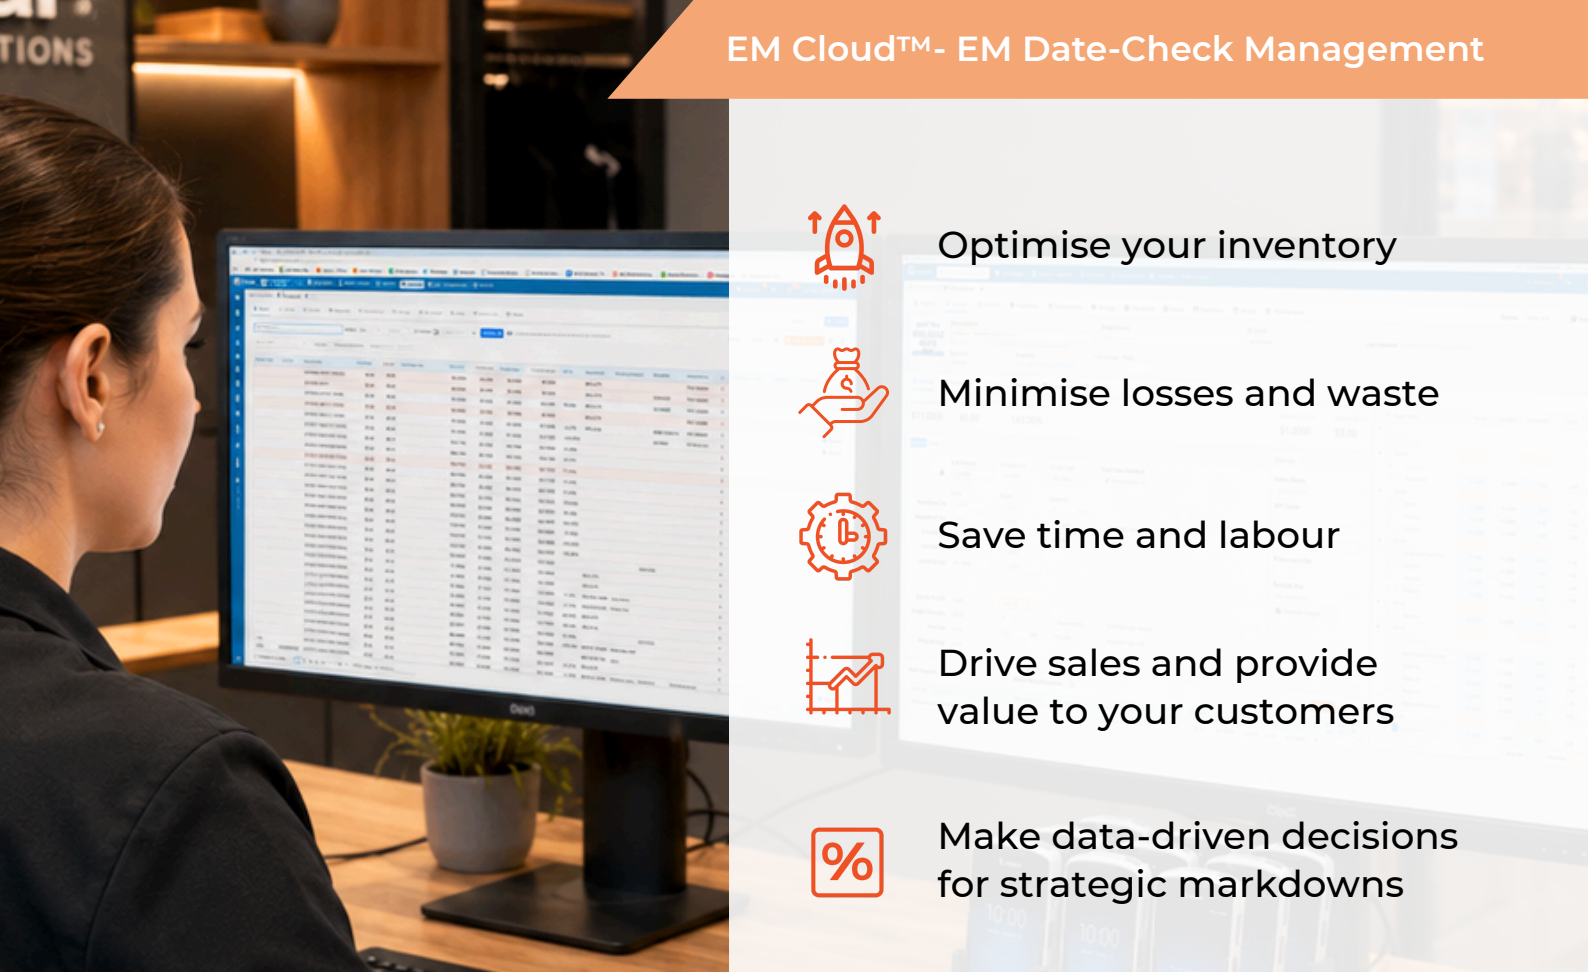

Introducing fresh food date check management solutions from GaP Solutions, designed to streamline fresh food management and reduce waste in grocery retail stores.

Our cloud-based, machine-learning-enriched solutions are redefining how you manage your store's inventory and waste.

Experience seamless optimisation of merchandising and replenishment while strengthening compliance and sustainability.

**Embrace the future of fresh food
date-check management with us.**

Optimise your inventory

Minimise losses and waste

Save time and labour

Drive sales and provide value to your customers

Make data-driven decisions for strategic markdowns

Time-Saving

Say goodbye to the tedious task of manually checking dates on fresh produce. Our automated system works for you, significantly reducing your staff's time on date checks.

Food Waste Reduction

With our advanced rule-based formulations and reporting system, you can effectively manage your fresh food inventory, minimising the risk of spoilage and reducing food waste. This benefits your bottom line and contributes to a more sustainable retail environment.

Daily Reports and Notifications

Stay informed and in control with our comprehensive daily reports and notifications. Receive up-to-date information on approaching use-by dates, enabling you to make timely markdown decisions and optimise inventory management.

Our Date Check Features

Close to Date Reporting

Easily find products nearing their expiration dates. Our system identifies items approaching their use-by dates, giving you ample time to implement strategic markdowns or discount promotions.

Early Expiration Notifications

Stay ahead of the game with our early notification system. Receive alerts via reports or directly through EM Omnia PDE for products nearing their use-by dates, allowing you to take proactive measures.

Integrated Electronic Shelf Labels (EM ESL)

Streamline your inventory management with our integrated EM ESL system. Benefit from flashing visual cues for easy picking and expiry date tracking. Effortlessly make price changes and markdowns, saving time and labour.

The transition to digital shelf labels is a game-changer for our clients. It is not only about improving efficiency and customer satisfaction, but also about integrating sustainability into our work, in this case, to help reduce operational waste.

Simplified, Automated, Innovative -with

2D Barcode & GS1 Datamatrix Markdown Functionality

Our advanced 2D barcode and GS1 Datamatrix functionality simplifies your markdown process. Quickly and accurately change prices, print labels, apply them to the products via EM Omnia PDE, and mark down the printer.

Comprehensive Reporting

Access detailed reports that show expiration dates in advance. Gain valuable insights into your inventory and make informed decisions to stop waste and drive sales.

Point of Sale Security

Our advanced point-of-sale software ensures food safety by automatically preventing transactions for products that have reached their use-by date. This guarantees the highest food safety standards both in-store and for your customers.

Our Labelling and Scale Features

Ezi Scale Operations Optimisation

Using GaP Solutions Ezi Scales brings a host of benefits to streamline your operations, from markdowns, stock takes, dump stock management and automatic use by date integration.

Up-to-Date Nutritional Label Printing

Stay compliant with all regulatory requirements for nutritional labelling. Our advanced nutritional label printing solution is built on an extensive food and ingredient database, ensuring your labels include all required nutrition facts panels, ingredient lists, allergen statements, and country-of-origin information.

AI Product Recognition at Point of Sale Scales

Leverage the power of Artificial Intelligence to enhance security, prevent loss, and manage inventory more effectively. Our AI fresh produce product recognition solution accurately identifies fresh produce at the point of sale, streamlining the checkout process and improving the overall shopping experience for your customers.

Linerless Label Printing for Versatility

Our scales are equipped to print on linerless labels, offering flexibility in label size and design. This enables your store to provide detailed ingredient labels for any packaging size, ensuring your customers have all the information they need at their fingertips.

Our Automated Ordering and Inventory Management Features

Seamless Supplier Integration

Our software efficiently connects you with your hosts and suppliers, simplifying the ordering process and ensuring timely deliveries.

Efficient & Profitable Automatic Reordering

Our advanced software analyses sales trends, marketing campaigns, future pricing, and current inventory levels to generate precise purchase orders automatically. This ensures your shelves are always stocked with the right products at the right time.

Real-Time Insights

We make decision-making with immediate access to critical data. Our software offers real-time insights into sales performance, stock, and other key metrics, enabling you to make strategic decisions that boost profitability and streamline operations.

Smart Inventory Management

Our software optimises stock levels based on detailed demand patterns. It significantly reduces excess stock and help stop waste, leading to a more sustainable and profitable operation.

EM Cloud™ is a complete solution tailored to improve the **efficiency** and **effectiveness** of every aspect of the retail cycle.

Built for purpose solutions

EM Cloud™ is a purpose-built solution offering up-to-the-minute data filtering and reporting, a cloud-based back-office system, a POS system, integrated weighing and labelling, food service solutions, and payment devices designed with payment security and a busy retail environment in mind.

Fast, secure and reliable

With powerful processors in our EM Pos™ systems and boasting continuous front-end operations and unassisted recovery during network failure, you can rely on EM Cloud™ solutions for the best uptime and reliability.

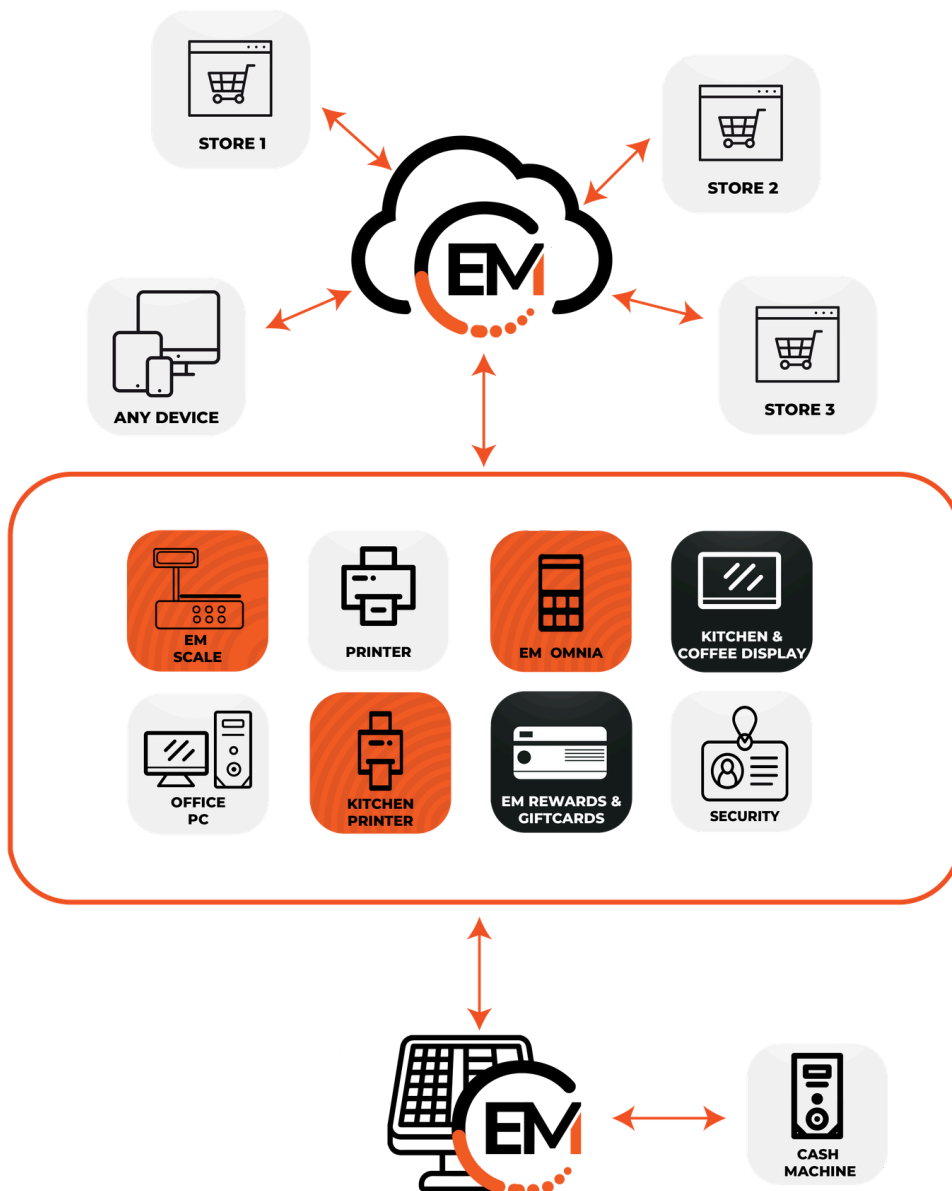

Solution driven

With the most innovative and secure industry solutions, we understand the needs of retailers. GaP Solutions continuously improves, strengthens and expands our solutions to help you grow your business and bottom line.

Any device, anywhere in the world

EM Cloud™ back office and head office systems can run from any device, anywhere in the world. Protect your margins with reports or profit-building tools complete with alerts. Achieve a holistic view of your value chain from import to sale.

EM Cloud™ System

Why Choose EM Cloud™ ?

Monitor your store in real-time from any connected internet device.

The perfect multi-store solutions, manage multiple stores from one device.

Utilise the latest in PDE software and hardware with EM Omnia.

Increase your customer retention through initiating our Ezi Rewards program marketing tool.

Integrate with multiple software applications, payment portals and rewards and e-commerce, platforms.

Mix and match multiple report filtering options to display the data you want to see.

Metcash Accredited and integration with all major warehouse and liquor host files in Australia.

No expensive server or remote access hardware needed due to secure cloud based offering.

Take advantage of the EM Invoicing and EM Scan system and reduce your invoicing time.

Unrivalled support and training.

EM Pos™ will run without internet, ensuring you are continuously operating efficiently.

Accept multiple tender types and integrations.

One Platform, Endless Possibilities for Retail Success

Empowering off site control

EM Cloud™ integrated enterprise retail software offers a complete back-office and head office system for single- or multi-store sites, providing total retail management solutions.

Inventory Control

View your inventory processes and transactions and pair them with deliveries from head office, direct suppliers or warehouse.

Maintenance

Price Changes, product file set up, print statements and more. Your all in one operational management tool.

Stock Take

Set up live stock takes, configure sections of the store for counting and can view inputs as they are scanned through the PDE.

Messages

Receive messages from head office and, in return, send messages to POS terminals. Allow for internal store communications with operators at POS terminals.

Electronic Shelf Labelling

Our EM electronic shelf labels integrate with our EM Cloud™ and EM Pos™ systems, automatically updating all pricing as it changes within the system, per the settings.

E-Commerce

Integrate with market-leading e-commerce systems to provide omnichannel management and control over pricing, inventory, and sales in-store and online.

Accounting Integration

Integrate your accounting software. Our programmers can work with your system of choice to create a secure link between the two programs.

Customers

Set up customer accounts and implement card limits, discounts, and promotions. Create customer groups and segments. View extensive customer reports.

Campaign Management

Create campaigns with custom start and end dates and set implementation rules across different campaign types.

Hosts

Retrieve pricing & promotion host files from buying groups. Keep sites compliant and consistent across all stores by periodically pushing host files.

Purchase Orders

Purchase orders and invoices are accessible from one module. Create purchase orders without ever leaving the EM Cloud™ portal.

Printing

Control which stores and which devices print which labels. Print runs for shelf labels, campaign labels and more. View your archived runs for printing history.

Reporting

EM Cloud™'s extensive reporting functionality will enable stores and head offices to manage many aspects of their businesses. We are continually expanding our reporting functionality to meet our clients' needs.

Improve your operational efficiencies with EM Pos™

Empower your staff with the right tools, improve operational efficiencies and delight your customers while encouraging repeat purchases. EM Pos™ has been developed to streamline the point-of-sale experience for both users and customers.

Quality service can now be achieved through fast, accurate transactions with EM Pos™, with all staff adopting the same intuitive interface across all departments.

Our Features

Faster Processing

Configure and colour operator screens to suit your operation. A comprehensive 'flip chart' function allows image & text buttons to be created for faster product selection.

EFTPOS Integration

Integrate with multiple EFTPOS providers for greater accuracy and faster transactions.

Rewards

Your own branded customer loyalty program, customer login, rewards options, reward app, members' email platform, and extensive customer tracking reports with Ezi Rewards.

Refund and Exchange

Refund & exchange functionality with configurable limits and manager authorisation. Plus, with financial reporting at the Pos, immediate & accurate information from attendants is at your fingertips for quick access.

Self Check Out Options

EM SCO creates a dynamic self-service experience that's more appealing, intuitive and natural for consumers to use.

Customer Facing Screens

Dual customer-facing screens. Running advertising and specials videos and animated GIFs while showing the transaction process and totals for the customer's viewing pleasure.

User permissions

Make sections available only to managers & staff with access permissions for different employees.

Vouchers

Customer charge account facility. Accept & process gift vouchers & coupons.

AI Product Recognition

AI-powered product recognition for fresh products improves the accuracy and efficiency of the checkout processes.

Notification

'Pop up' messages help eliminate errors and notify staff. Lane pick-ups and excess cash notifications.

Receipt Marketing

Docket marketing for the top and bottom of your receipts.

Moving to EM Cloud™ was one of the biggest decisions we've ever made in our business, and we haven't looked back. The GaP Solutions team provides unparalleled service and support, allowing us to focus on running our store. The ordering and inventory modules, along with master-level data, have significantly increased our business efficiency.

— Ghaz Ahmed, Owner, Ahmed Group

I have used many point-of-sale systems over the years, and GaP Solutions is one of the best. It's streamlined, user-friendly, and significantly improves our sales processes.

The Customer Service team is always available to take calls immediately or within a reasonable wait time. They are top-notch and highly recommended.

— Maria Labruna, Manager, La Manna and Sons

GaP Solutions' EM Cloud™ allows us complete visibility and control over every aspect of our supermarket. We can make informed, real-time decisions and leverage all commercial opportunities as we see fit.

— SUPAEXPRESS Chapman, Owner

Allow Ezi Scale to become an integral part of your business.

Ezi Scale is a trade-approved, completely customisable, flexible solution configured to meet your business requirements.

Whether you are running a seafood store or a butchery, single or multi-store, our solution can be configured to meet your requirements.

Adaptability and integration go hand in hand with your Ezi Scale, allowing you to integrate with our renowned EM Cloud™ and EM Pos™ integrated retail management software.

Your Ezi Scale can operate as a stand-alone machine or networked with other Ezi Scales for seamless interaction.

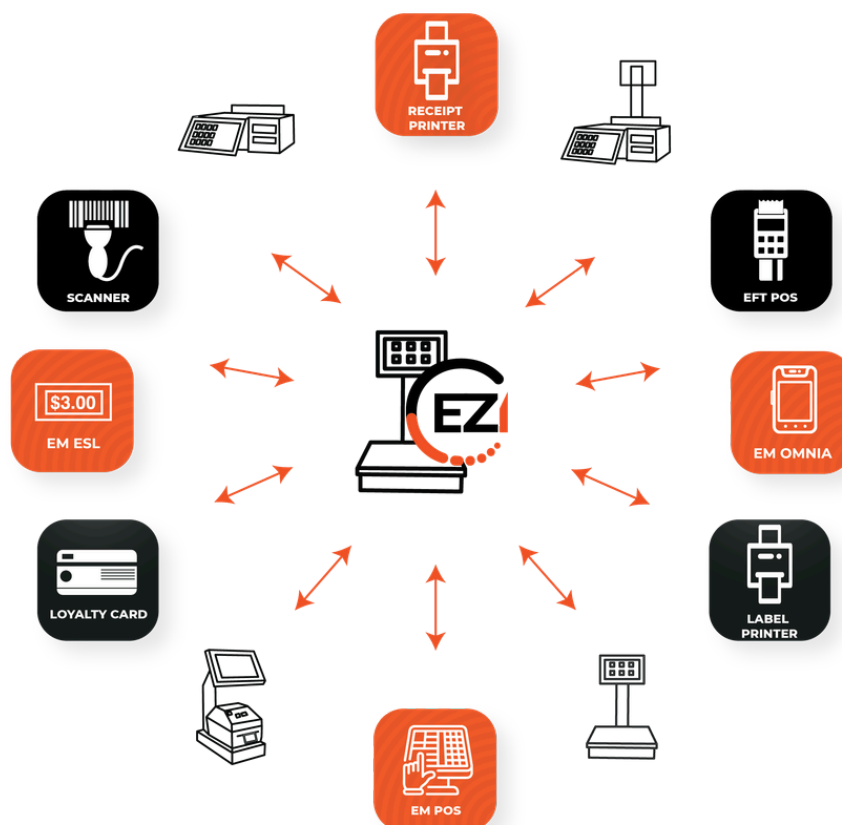

We are constantly adding new features and improving your Ezi Scale user interface.

Integrated EFT-POS saves time at checkout, cash up and eliminates missed keyed sales.

Ezi Scale Hardware and Feature Integration

Ezi Ticket

Add Ezi Ticket seamlessly to your Ezi Scale setup for organised customer queueing and order-taking, with advertising printed on your tickets, plus an optional “now serving” voice announcement.

EM ESL

Easily update electronic shelf labels using Ezi Scale and EM Omnia PDE for fast, seamless price changes that support your dynamic pricing strategy.

Ezi Rewards

Integrate your Ezi Scale with our Ezi Rewards. Your own customer loyalty program for rewarding your customers, encouraging repeat purchases, and tracking customer spending.

EFTPOS

Your Ezi Scale can be integrated with multiple EFTPOS providers, allowing for accurate and quick transactions.

Clean

- Quick and easy cleaning of the scale.
- Surface - problem-free removal of stray labels.
- Load plate - optimum ease of handling.
- Displays - frameless for maximum cleaning efficiency.

Load

- 3-in-1 all-purpose printer: ticket, labels and linerless labels.
- Enables paper rolls to be changed in seconds.
- Printing of label layouts on pre-printed linerless paper.
- Paper width up to 80 mm, roll length up to 80 m, print speed up to 100 mm/s.

Level

- Accurate weighing results even when the scale is not levelled, with no loss of revenue.
- High-end PC-based scale with an outstanding Intel® Dual Core Processor for optimum performance and perfect graphics with minimum power consumption.
- Tilt compensation for uneven surfaces.

Remotely manage and control pricing from a central location with EM ESL

Promotions can start and end before retailers have had a chance to adjust shelf pricing, resulting in loss of turnover and disappointed customers due to inaccurate shelf pricing.

Head office or distributors often create promotions with suppliers. These cost-saving promotions are sometimes crucial for community stores to remain competitive against larger retailers.

However, these deals create the need to update prices more frequently in your store and make it a time-consuming exercise.

With EM ESL, the electronic labels are synced with your EM Cloud™ and EM Pos™ systems, updating automatically according to your settings.

Be Smart - Go from Paper to ESL

Paper Label

ESL Label

- Removal of shelf labels (environmental issue).
- Doubling up on labour due to a typo or incorrect placing.
- Customizable content.

- Real-time process check function.
- Real-time stock check.
- Customizable layout.

Optimise margins

Optimise margins by adjusting pricing as your variable cost changes, for example labor costs on weekends and evenings.

Consistent margins

Keep margins consistent by acting quickly when wholesale prices changes.

Inaccurate pricing

Avoid loss in revenue due to inaccurate pricing between shelf price and pos pricing.

Save on labor cost

Reduce labor cost, by updating pricing with a touch of a button.

Designed with the future of retail in mind, EM Omnia is powerful software that allows you to process orders, track inventory, receive orders, and do stocktakes, all while on the go.

With our EM Omnia PDE devices, you can

View detailed product data, including pricing, active promotions, specials, and sales history.

Check upcoming promotions while placing orders directly from the shop floor.

View order quantities, average weekly sales, and historical sales data per product.

Locate products and view their designated shelf facings in real time.

Update and control Electronic Shelf Labels (ESLs).

Price Check functionality for use-by-date management.

Reap the benefits of integrating your accounting package with EM Invoicing

Connect EM Cloud™ to your accounting software through a secure third-party integration to improve data accuracy, reduce manual entry, and lower operational costs.

Accurate, Reliable Data

Large transaction volumes can lead to data errors and inefficiencies.

EM Invoicing ensures a clean, consistent data flow between systems, reducing the risk of manual-entry errors and processing delays.

Accounting Cost Cutting

With integrated, high-quality data, your accounts can be reconciled quickly and efficiently, saving time, reducing accounting hours, and cutting costs.

Save Time and Simplify Processes

Automatically sync your trading and purchasing data with your accounting software.

This automation eliminates tedious admin tasks and streamlines your end-of-day accounting processes.

GL Code Mapping

Map General Ledger (GL) codes in EM Cloud™ to those in your accounting system to enable faster, more accurate reconciliation and reporting.

Powerful Reporting

Simplify Office Management and Make Informed Decisions with Ease

EM Forecourt, integrated with EM Cloud™, provides a complete solution for single or multi-store sites. Manage wet stock with ease and access powerful reporting tools to filter, schedule, and export reports effortlessly.

Detailed Reports

Real-Time Data

Comprehensive Reporting

Any Device, Anywhere in the World

Optimise Pricing

Automated Operations

Achieve Total Control from Import to Sale

Fuel-Focused and Forecourt Ready

The EM Forecourt system's intuitive visual user interface puts you in full control. It provides real-time graphical pump status and can manage up to 72 dispensers simultaneously.

User-Friendly Interface

Clear icons and animated prompts streamline operations, while audio cues reduce operator actions, enhancing speed and minimising errors.

Comprehensive Fuel Control

Authorise, pause, stop, lock, and unlock all pumps or individual dispensers. Automated or manual entry for tank gauge readings and pump meter data improves transaction processing times.

Profit Optimisation

With automated, data-driven pricing and efficient resource management, you can effortlessly maximise your profits and stay competitive and responsive to market demands.

Pos™ - Streamlined Operations

Empower your staff with EM Pos™, designed for fast, accurate transactions that enhance service quality and efficiency.

Enhanced Security

Implement user permissions and notification systems to streamline operations and reduce errors.

Faster Transactions

Integrate with multiple EFTPOS providers at the same time for swift, error-free payment processing.

Customer Loyalty

Create custom loyalty programs, manage rewards, and track customer behaviour with Ezi Rewards.

Fuel Payment Providers

EM Forecourt offers seamless integration with all major fuel payment providers, ensuring compatibility and flexibility for your business.

Accounts and Voucher Transactions

Streamline customer charge account facility, enabling easy management of customer accounts. Seamlessly accept and process gift cards, coupons, vouchers, and more, ensuring a smooth transaction experience.

Kitchen & Coffee Bar Connectivity

Seamless Order Management

Keep your kitchen and coffee bar operations synchronised with  **EM Pos™**

Touchscreen Interface

Streamline orders with a touchscreen system in the kitchen and coffee areas.

Bump Bar & Printing

Ensure smooth kitchen operations with bump bar functionality and kitchen printing.

Real-Time Updates

Front-end staff can track order statuses and ensure efficient preparation.

Made for Retail

A customer loyalty system is a powerful tool in today's competitive retail environment, helping drive repeat purchases through rewards, discounts, and gift cards.

Ezi Rewards simplifies loyalty program management by automatically issuing points, vouchers, and member pricing for both in-store and online purchases. Integrated with EM Pos™, it provides real-time visibility of points earned, remaining points to the next bonus, and current totals — displayed directly on the customer's till slip — while also offering valuable insights into buying habits to better understand customer behavior.

Drive sales with point generation type promotions.

Design and print your reward, gift or membership card.

Track your customers' retention growth.

View increase in customers' purchase rate as they start shopping more often.

View detailed reporting on reward redemptions, liability, and customer activity.

Identify and reward your VIP Customers.

Ezi Rewards App

Discover the Future of Customer Engagement with GaP Solutions Ezi Rewards APP

Unlock Unmatched Benefits for Your Retail Business

Transform your retail business with GaP Solutions Ezi Rewards APP. Elevate customer engagement, streamline shopping experiences, and drive sales with our innovative digital solutions.

Customer Engagement

Engage your customers like never before through personalised offers and seamless rewards tracking.

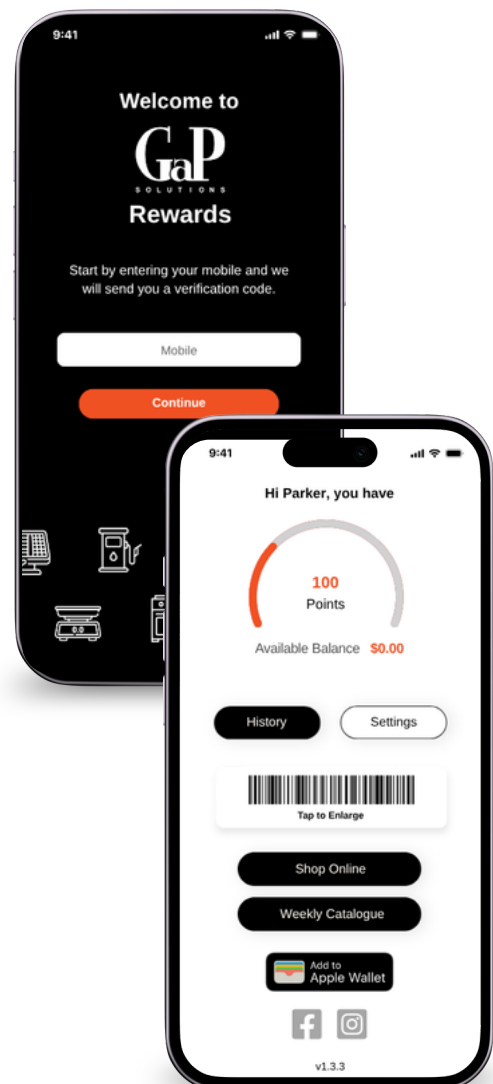

Paperless Catalogues

Provide easy access to weekly catalogues, enabling customers to browse the latest offers and deals conveniently from their devices.

No More Physical Card

Say goodbye to the cost and management of physical reward cards. Our app integrates effortlessly with mobile wallets, making transactions secure and convenient.

Always working, always on time, consistent experience for your customer

In today's fast-paced retail industry, customer choice isn't just about where they shop or what they choose to buy; how they choose to pay and go needs to be considered.

By embracing self-checkout technology, retailers can significantly improve the customer experience by providing customers with a fast and convenient way to pay. Self-checkout systems such as GaP Solutions EM SCO have been designed to make checkout processes efficient and fast.

These systems are also easy to integrate and maintain, making them a perfect fit for any retail environment. This technology can offer retailers major advantages in terms of cost savings, resource efficiency, and cost-effective labour management.

Moreover, self-checkout technology can help retailers save space. With a compact design and quick installation process, these solutions are the perfect solution for retail businesses looking to optimise their checkout processes without taking up too much floor space.

Case Study

An examination of critical data shows that four standard lanes operating from 8:00 am until close at 9:00 pm would require staff to cover 52 hours per day of operating trade.

When looking at the same situation utilising four self-checkout lanes operating from 8:00 am until 9:00 pm, with only one person per shift required to cover the same operating period equal 13 hours of trade.

Thus 39 hours less attendant time required.

These savings can be carried directly to your profit line or used to invest back into your business (for example freeing up checkout staff to replenish shelves and assist your customers) it's a compelling reason to seriously consider self-checkouts.

How can make a difference

Improved Customer Experience

Enhance your customers' shopping experience with added convenience and autonomy.

Increase Staff Productivity

Maximize efficiency by allowing one employee to oversee multiple kiosks, ensuring they keep up with customer demand. This allows other staff members to prioritize providing an excellent shopping experience.

Faster Checkout

A user-friendly self-checkout point of sale system is significantly faster than waiting in line for a cashier.

Less Space

Self checkout kiosks take up less space than regular checkout registers. The reduction of queues further minimizes the space used.

Product Recognition Technology

Improve scanning accuracy, eliminate manual code entry, and reduce the need for assistance. Experience advances in loss prevention, decreased shrinkage, and enhanced inventory accuracy.

Our Features

Intuitive

EM SCO creates a dynamic self-service experience that's more appealing, intuitive and natural for consumers to use.

Guidance Lights

Guidance light directs customers attention to the next point of interactions.

Enhance Audio Tones

Enhance audio tones will assist customers through the check out process.

Cashless Configuration

EM SCO System can be seamlessly configured for a fully cashless setup.

Optimised Configuration

EM SCO offers optimised configurations that shoppers can use for a broad range of basket sizes, store formats, and mobile shipping.

Cash Recycling Option

The EM SCO system supports the integration of a cash recycling unit, enhancing its functionality and convenience.

Maximize Retail Space

7 Minimize usage of valuable retail space through the use of self-checkout lanes.

Unlock Exceptional Performance with the EM Pos™ Server

The EM Pos™ Server is a powerhouse designed to enhance communication between the EM Cloud™ and your EM Pos™ system. This robust unit ensures your store's system operates with speed, security, and reliability, offering seamless integration and streamlined operations across your entire retail environment.

Dual screens available for standalone use.

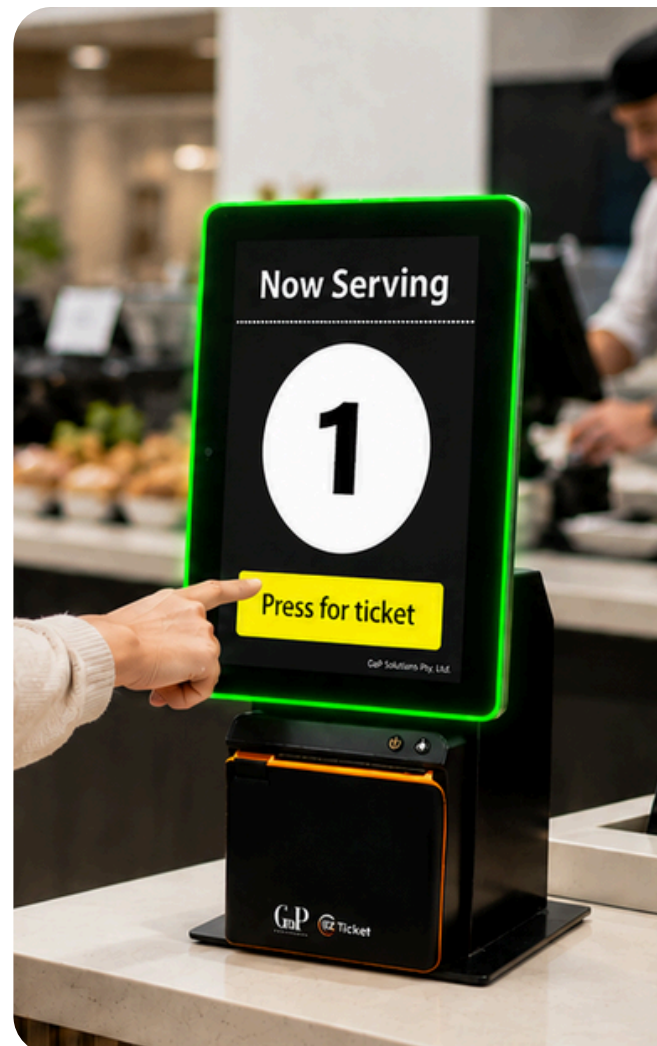

Now serving' announcements via audio module.

Ezi Scale integration empowers unmatched queue control on one screen.

'Now serving' number displays on both Ezi Ticket and Ezi Scale screens.

”

The role of business
is to provide
products and services
that make people's
lives better.

“

Innovation, it's in our blood.
Being relevant through innovation
is keeping us ahead of the pack.

”

John Goodacre
Founder

Our drive for innovation, coupled with an ability to identify new and valuable avenues within the industry has fuelled our rapid growth and success.

We have provided innovative retail solutions to the Australian and international retail market for the last thirty years. We have experienced consistent growth and achieved long-term success even through challenging economic climates.

The measure of any company is how well it reacts to changes in the market and the world. GaP Solutions is a prime example of the truth in this statement.

“

Unity is strength... when there is **teamwork** and **collaboration**, great things can be achieved.

”

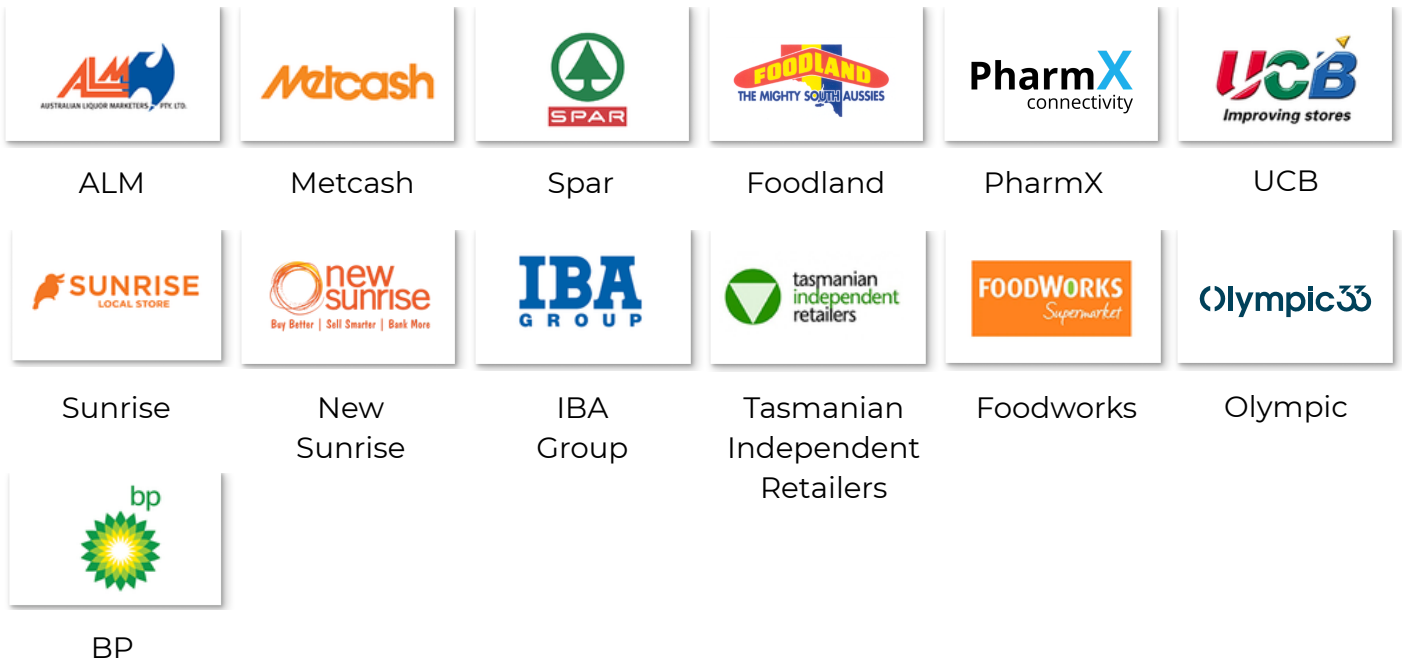

For decades, we reacted to the constant changing conditions of our retail industry. Still, we have excelled at leading by developing opportunities and advantages where others just followed.

GaP Solutions is continuously adapting as a business to match the retail market needs in which we operate. We have always reacted to specific trends and anticipating others. The result of this continuous process is an innovative, flexible and solution-driven organisation.

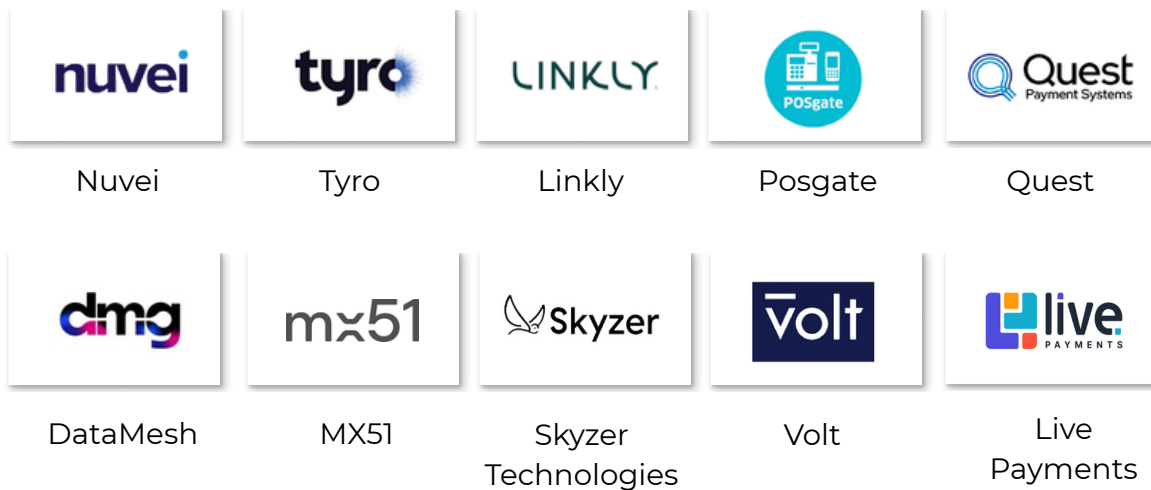

However, some things will never change, such as our commitment to develop ongoing advantages for our clients and provide a truly solution-based product to the market.

Our team of inspiring management has, and always will be committed to the core values behind GaP Solutions' success. We expect the same commitment from our employees and business partners: Offering choice, fundamental technical skills, expert industry knowledge , relevance through innovation and trust and reliance.
